-  **PATRON PAGING**
-  **QUICKLY PAGE STAFF MEMBERS**
-  **SECURE ROBUST UNIT**
-  **SIMPLE - ONE TOUCH SYSTEM**

**RESTAURANT PAGING SOLUTIONS**

A great deal of time, effort, and expense can go into creating the perfect setting for any restaurant. That ambiance is often interrupted by overhead public address systems.

The Maitre'd is a customer contacting system that enables food servers to contact customers as soon as their meal is ready. Maitre'd is a simple, cost effective solution for restaurant paging. The system is purpose-built for the hospitality industry but may be used in a myriad of other situations.

**PATRON PAGING**

The operation of the system is very simple. When the meal is placed in the serving window, the chef (or a member of the serving staff) simply presses the button corresponding to the relevant patron and the pager vibrates on the customer's table. This ensures that the patron is served promptly and the food is delivered piping hot.

**QUICKLY PAGE STAFF MEMBERS**

Maitre'd may also be used to contact food servers in a busy restaurant. The system is designed for restaurants that are proud of their customer service reputation and have an active interest in reducing the cost of labor associated with high staffing levels. The system is based on the premise that idle staff cost the same amount of money as busy staff, so by reducing the number of idle staff you increase your bottom line.

**SECURE ROBUST UNIT**

The Maitre'd unit is an unobtrusive unit that can be secured to a wall in a kitchen or serving area. The robust unit is able to operate within the hot environment that is the kitchen of any restaurant.

**SIMPLE - ONE TOUCH SYSTEM**

Although the Maitre'd was originally designed to be used within the hospitality industry, any number of industries will benefit from its ingenious simplicity. In any situation where contact of personnel with a simple message occurs on a regular basis, the low cost Maitre'd system is just the thing for the low cost Maitre'd system.

Simply press the button corresponding to the pager you want to contact and, in a matter of seconds, the pager will receive and display the message.

**USE MULTIPLE MAITRE'D UNITS**

The Maitre'd expansion model allows you to connect multiple units, via RS485, which means only one unit will need to have a transmitter. By combining multiple Maitre'd units, you are able to contact a surprising number of staff members. This is ideal for larger restaurants with a large number of floor staff.

# MAITRE'D

## TECHNICAL SPECIFICATIONS

Maitre'd	
Recipient Capacity	16 Recipients
Supported Protocols	POCSAG 512 or 1200 bps
Protocol Format	Alphanumeric, Numeric or Tone Only
Internal Transmitter	2-4 Watts
Frequency Range	VHF - 148 - 174 MHz UHF - 440 - 470 MHz
Channel Spacing	12.5kHz or 25kHz
Unit Buttons	16 buttons on lexan
Led Indicators	Power, Transmit
Dimensions (Excluding Antenna)	173(l) x 250(w) x 42(h) mm 6.8(l) x 9.8(w) x 1.65(h) inches
Weight	1.7 kg 3.7 lbs
Power Requirements	12VDC @ 2 Amps regulated
Power Consumption	Standby: 45mA
Modulation	NRZ, 2 Level FSK
Deviation	± 4.5 kHz or ± 2.5 kHz
Data Rate	512bps
Warranty	1 Year Factory Warranty

## RESTAURANT PAGING WITH THE MAITRE'D IS AS EASY AS ...

- Once a customer's order has been taken it can be sent through to the kitchen.
- When the order is ready, the kitchen staff are able to send a message to the appropriate staff member.
- The staff member will then receive a message on their pager, notifying them that an order is ready.
